STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

An interview was conducted between the undersigned and Examiner Kennedy on October 18, 2004.

The undersigned emphasized those amendments and arguments pertaining thereto in the Response filed on September 23, 2004. Specifically with respect to claim 49, it was asserted that the added limitation of the insulator layer being formed at least by forming a first silicon dioxide layer on a first substrate, forming a second silicon dioxide layer on a second substrate and joining the first substrate to the second substrate was not taught or suggested by the applied art in combination with

the other claim 49 limitations. The Examiner agreed generally that such amendments defined patentable subject matter, subject to further searching and consideration. The undersigned also asserted that the withdrawn claims should now come back into this application, and be allowed.

Respectfully submitted,
